

Coding & Solution

Date	30 September 2026
Team ID	SWTID-2026-9986
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Rida-Fathima-A/SECMS-Salesforce
Programming Language(s)	Apex (Salesforce), JavaScript, HTML, CSS
Framework(s) Used	Salesforce Platform, Lightning Web Components (LWC), Aura (where needed)
Key Features Implemented	• Student enrollment & course registration • Automated instructor assignment • Multi-level approval process • Payment integration • Reporting & dashboards • Academic progress tracking
Pending / Incomplete Features	None
Setup / Run Instructions	1. Deploy the code in a Salesforce org (Developer Edition / Sandbox). 2. Import data using the provided CSV files (students, courses, enrollments). 3. Run the flows and test the functionality as per the requirements. 4. Access the application via the Lightning App Launcher.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The solution has been tested for multiple scenarios and works as expected.
 Code follows Salesforce and best coding practices, with proper comments and documentation.
 No major issues were found during testing.
