

## Project Features Documentation

|                      |                                                       |
|----------------------|-------------------------------------------------------|
| <b>Date</b>          | 30 September 2026                                     |
| <b>Team ID</b>       | SWTID-2026-9986                                       |
| <b>Project Name</b>  | Student Enrollment & Course Management System (SECMS) |
| <b>Maximum Marks</b> | 5 Marks                                               |

### Functional Features Overview:

The SECMS application centralizes student, course and enrollment data in a single Salesforce platform. It automates admissions, course registrations, communication, payments and reporting, and provides academic progress transparency for administrators, enrollment officers and instructors.

| S.No | Feature Name                   | Feature Description                                                     | Module / Component   | Status (Done / In Progress / Pending) | Marks Contribution |
|------|--------------------------------|-------------------------------------------------------------------------|----------------------|---------------------------------------|--------------------|
| 1    | Student Admissions             | Capture and manage student applications and admissions.                 | Admissions (Flows)   | Done                                  | 1                  |
| 2    | Course Registrations           | Allow students to register for available courses.                       | Enrollment (Flows)   | Done                                  | 1                  |
| 3    | Communication                  | Automated emails and notifications to students, instructors and admins. | Messaging (Flow)     | In Progress                           | 0.5                |
| 4    | Course Offerings               | Manage course catalog and availability.                                 | Courses              | Done                                  | 0.5                |
| 5    | Instructor Assignments         | Automated/ manual assignment of instructors to courses.                 | Assignments (Flow)   | Done                                  | 0.5                |
| 6    | Approval Processes             | Multi-level approval for enrollments and course changes.                | Approval Process     | In Progress                           | 0.5                |
| 7    | Payments                       | Handle online payments and payment tracking.                            | Payments (Flow)      | Pending                               | 0.5                |
| 8    | Reporting & Dashboards         | Generate reports and dashboards for key metrics.                        | Reports & Dashboards | Done                                  | 0.5                |
| 9    | Academic Progress Transparency | Track student progress and course completion.                           | Student Portal       | Done                                  | 0.5                |
| 10   | Automated Task Creation        | Create tasks for follow-ups and notifications.                          | Flow                 | In Progress                           | 0.5                |
| 11   | Validation Checks              | Ensure data accuracy and business rules.                                | Validation Rules     | Done                                  | 0.5                |

### Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 11            |
| Total Features Implemented | 8             |
| Core / Must-Have Features  | 10            |

### Additional / Nice-to-Have Features:

- Real-time notifications for approvals and updates.
- Mobile app support for students and instructors.

### Features Tested & Verified:

| S.No | Feature Name                 | Status (Yes / No) | Remarks                   |
|------|------------------------------|-------------------|---------------------------|
| 1    | Student Registration & Login | Yes               | Working as expected       |
| 2    | Course Registration          | Yes               | Working as expected       |
| 3    | Payment Integration          | Yes               | Working as expected       |
| 4    | Reporting & Dashboards       | Yes               | Data is fetched correctly |
| 5    | Automated Task Creation      | No                | In progress               |
