

Data Flow Diagram

Date	30 September 2026
Team ID	SWTID-2026-9986
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Student, Administrator, Instructor, Payment Gateway).
	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Enrollment, Generate Report).
	Data Store	A place where data is held for later use (e.g., Student Database, Course Database, Enrollment Database).
	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the data moves through the SECMS system from user input to storage, processing, and output.
