

Date	30 September 2026
Team ID	SWTID-2026-9986
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should do).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should be).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Student Admissions	[Capture student registration, application review and admission approval process]	High
2	Course Registrations	[Allow students to browse available courses and register for them]	High
3	Communication	[Enable system notifications and communication between students, instructors and staff]	Medium
7	Payments	[Track and process student payments and fees]	High
8	Reporting	[Generate reports on enrollment, revenue, academic progress, etc.]	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	[System should handle peak load efficiently and respond within acceptable time]	(e.g., Page load < 2 seconds)

2	Scalability	[Support growth in users, courses, and data volume]	(e.g., 10,000+ concurrent users)
3	Security & Data Privacy	[Protect student and institute data with encryption and secure access]	(e.g., End-to-end encryption, role-based access)
4	Reliability & Availability	[Ensure system uptime and minimal downtime]	(e.g., 99.9% uptime per month)
5	Usability & Accessibility	[Ensure easy navigation and accessibility across devices]	(e.g., WCAG 2.1 AA standards)
6	Other	[Add any additional non-functional requirements]	(e.g., Maintainability, Portability)
