

Technology Stack

Date	30 September 2026
Team ID	SWTID-2026-9986
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	Salesforce Lightning Experience / Lightning App Builder	Responsive Salesforce UI for student, course and enrollment management.
2	Backend / Server-Side	Salesforce Platform / Apex / Flow	Automates business logic, approvals, validations and workflows.
3	Database / Data Storage	Salesforce Objects / SOQL	Secure relational storage for students, courses, enrollments and payments.
4	Cloud / Hosting / Deployment	Salesforce Cloud	Cloud-based, scalable and managed deployment.
5	Version Control & CI/CD	GitHub / Salesforce DX	Supports source control, collaboration and deployment management.

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
6	Third-Party APIs / Other Tools	Salesforce Reports, Dashboards & Approval Processes	Provides analytics, approvals and academic progress tracking.
