

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-9986
Project Title	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to design a comprehensive Salesforce application for academic enrollment operations of an educational institute. The system will centralize student, courses, and enrollment data in a single platform, enabling administrators, enrollment officers, and instructors to manage admissions, course registrations, communications, course offerings, instructor assignments, payments, approvals, reporting, and academic progress. The solution will include automation, validation checks, and multi-level approval processes to ensure efficiency, transparency, and a seamless experience for all stakeholders.

Project Overview	
Objective	To streamline and automate academic enrollment operations by centralizing student, course, and enrollment data in Salesforce.
Scope	Covers student admissions, course registrations, communication, course offerings, instructor assignments, payments, approvals, reporting and academic progress tracking.
Problem Statement	
Description	Manual processes lead to data silos, delays, and inefficiencies in enrollment and course management. Lack of transparency and real-time tracking affects student experience and operational efficiency.
Impact	Causes delays in admissions and registrations, increased administrative workload, data inconsistencies, and reduced visibility of academic progress.
Proposed Solution	
Approach	Build a Salesforce application with automated flows, approval processes, validation rules, and dashboards to manage the complete enrollment lifecycle from admission to academic progress.
Key Features	- Student admissions & course registrations - Automated instructor assignment - Multi-level approval processes - Payments & communication - Reporting & dashboards - Validation checks & automated task creation

	- Real-time decision-making for quick approvals. - Continuous learning to adapt to evolving educational needs.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD
Software		
Frameworks	Salesforce Platform, Flows, Approval Processes, Validation Rules	Salesforce
Libraries	N/A (Salesforce standard tools)	N/A
Development Environment	Salesforce Developer Console, VS Code (for integrations)	IDE + Salesforce Org
Data		
Data	Student, course, enrollment, instructor and payment data	Sample dataset / production data
