

## Code-Layout, Readability and Reusability

|               |                                                       |
|---------------|-------------------------------------------------------|
| Date          | 30 September 2026                                     |
| Team ID       | SWTID-2026-9986                                       |
| Project Name  | Student Enrollment & Course Management System (SECMS) |
| Maximum Marks | 5 Marks                                               |

### Code-Layout Checklist:

| S.No. | Code Quality Parameter    | Description                                    | Followed (Yes / No / Partial) | Remarks                                      |
|-------|---------------------------|------------------------------------------------|-------------------------------|----------------------------------------------|
| 1     | Consistent Indentation    | Uniform spacing/tabs used throughout the code. | Yes                           | Used 2 spaces for indentation.               |
| 2     | Proper File Structure     | Files and folders are logically organized.     | Yes                           | Followed standard Salesforce structure.      |
| 3     | Meaningful Variable Names | Variables reflect their purpose clearly.       | Yes                           | Used descriptive naming conventions.         |
| 4     | Function / Method Names   | Functions are descriptively named.             | Yes                           | Used meaningful method names.                |
| 5     | Code Comments             | Inline and block comments explain logic.       | Yes                           | Added comments for complex logic.            |
| 6     | Modular Design            | Code is split into reusable functions/classes. | Yes                           | Used helper classes and service classes.     |
| 7     | No Redundant Code         | Duplicate or unused code is removed.           | Yes                           | Removed unnecessary code and variables.      |
| 8     | Error Handling            | Exceptions and errors are handled gracefully.  | Yes                           | Used try-catch blocks and custom exceptions. |

### Reusable Components / Modules:

| S.No. | Component / Module Name       | Language / Technology | Where Reused                         | Reusability Level (High / Medium / Low) |
|-------|-------------------------------|-----------------------|--------------------------------------|-----------------------------------------|
| 1     | Apex Controller               | Apex (Salesforce)     | Student, Course & Enrollment modules | High                                    |
| 2     | Lightning Web Component (LWC) | JavaScript (LWC)      | Dashboard & Student Portal           | High                                    |
| 3     | Flow                          | Salesforce Flow       | Approval process & Enrollment flow   | Medium                                  |
| 4     | Visualforce Page              | Visualforce           | Reports & PDF generation             | Medium                                  |
| 5     | Custom Utility Classes        | Apex                  | Validation checks & Data processing  | High                                    |

### Overall Code Quality Assessment:

| Aspect                   | Rating (4-5) | Comments                                                              |
|--------------------------|--------------|-----------------------------------------------------------------------|
| Code Layout & Structure  | 4            | Well structured and follows Salesforce best practices.                |
| Readability              | 4            | Clean code, proper naming and sufficient comments.                    |
| Reusability              | 5            | Modular components and reusable classes.                              |
| Documentation / Comments | 4            | Inline comments and clear documentation.                              |
| Overall Score            | 4.25 / 5     | Good code quality with minor improvements needed in comment coverage. |
